

ADL DELIVERS SIX NEW ENVIRO200 LOW EMISSION BUSES TO ATLANTIC TRAVEL

September 14, 2021

Alexander Dennis Limited (“ADL”), a subsidiary of NFI Group Inc. (“NFI”), one of the world’s leading independent global bus manufacturers, today announced that it has delivered six new Enviro200 low emission single deck buses to Bolton-based operator Atlantic Travel (GB) Ltd.

The 10.8m long Enviro200 buses each have 41 seats and went into operation in early September 2021.

The vehicles are equipped with ADL’s award-winning SmartPack efficiency technology which enables Low Emission Bus certification, as well as belted ADL SmartSeats, a digital tachograph, white LED destination equipment and bonded glazing.

Atlantic Travel provides luxury coach travel across the UK as well as local bus services and has an extensive fleet of vehicles to meet these requirements. This is the company’s first order with ADL.

Director Yasser Dean said: “These buses are low carbon and will complement our existing fleet perfectly as we continue to grow and develop our offer to our customers.”

ADL Sales Account Manager Charlie Miller added: “We’re delighted to have delivered these buses to Atlantic Travel who are a new customer for us. The vehicles will be a high quality addition to their fleet and we look forward to working with them again in the future.”
